No 04135159 VAT GB755195017

Our climate change policy statement is set out below. It is owned and endorsed by the Senior Management Team; responsibility for the successful implementation of this programme belongs with every IPM Facilities employee at each level and function in the organisation.

IPM Facilities strives to limit its impacts on climate change and to carry out all its business activities in a sustainable manner. We believe that industry has a key role to play in finding sustainable solutions to today's climate challenges.

In accordance with our environmental policy, we will:

- Aim to reduce the energy used in our operations
- Implement alternative or renewable energy technologies such as combined heat and power plants and solar panels, where practical to provide additional sustainable energy for our facilities
- Engage with stakeholders to combat climate change
- Work with suppliers to reduce the carbon embedded in packaging materials, the carbon footprint of equipment and suppliers to minimise their carbon impacts
- Set targets to reduce our supply chain carbon emissions
- Report our greenhouse gas emissions, targets, results, and activities openly and in accordance with relevant reporting agencies

Signed:

Mark Noakes – Managing Director
